● Profile

I'm an **A-to-Z marketer and business founder** who understands customers, consumers and the numbers behind them. I start with **branding and USPs**, then build everything around them: website, social media, content, SEO, paid ads, email and e-commerce, all measured against what people actually spend.

I read **patterns in sales, spending and the market**, and turn them into decisions. I've run marketing for brands selling on Amazon at two partner agencies, delivered **CRM and ERP projects including Salesforce at Potato Head**, and founded **Mavis**, where I own the brand, marketing, sales and product. I connect marketing, sales, data and the back office so a business runs as one.

The bridge I build · marketing → sales → data → CRM → ERP

01

Marketing A-Z

Branding & USPs, website, social media, content, SEO & paid ads

Team lead

02

● Core skills

Marketing A-Z

Branding and USPs first, then website, social media, content, campaigns, email and SEO.

Paid ads & e-commerce

Amazon and online advertising, listings and conversion, measured against spend and sales.

Customers & consumers

Understanding who buys, why, how they spend, and what brings them back.

Data & sales analysis

Excel, reporting and dashboards. Spotting patterns in sales, spend and campaigns.

CRM

Hands-on Salesforce, guest data, segmentation and email marketing.

ERP & back office

Project-managed ERP builds; founded a back-office platform for hospitality.

● Professional experience

Founder & Owner · Marketing, Product & Sales

Present

Mavis, Bali

- Founded Mavis, a hospitality technology company, and built its flagship platform: a back office with CRM, supplier management, sales reporting and team tools in one place.
- Own all marketing end to end: brand, USPs, positioning, messaging and the motto 'One team. One platform.'
- Researched the market directly with venue owners and staff, studying how they work, what they pay for and what frustrates them, and used it to shape the product and pitch.
- Repositioned the brand around 'Everyone Matters' after testing which message resonated most with buyers.
- Designed and launched the marketing website, including a guided product tour page built to turn visitors into demo bookings.
- Run sales from first contact to close: discovery, demos and follow-up. My first two sales calls both ended in a yes, and six venues are lined up to go live.
- Planned the go-to-market and launch sequence, so new venues are onboarded smoothly and become references.
- Built sales reporting that imports venue sales data, so owners can see revenue patterns and performance without spreadsheets.
- Designed the CRM side, including guest feedback surveys, with membership and repeat-guest rewards on the roadmap.
- Built a Vendor Directory and 25+ modules covering SOPs, tasks, recipes with menu costing, recruitment and team communication.

Mavis projects

Sundari Wellness · Booking system Co-founder with the spa owner · In progress

- Co-founding a smarter spa booking product after the owner found existing tools too limited.
- Mapped how customers book, pay and are allocated to rooms, times and staff, and built the first working version.
- Designing customer and booking data so revenue, history and repeat visits can be tracked at a glance.

Sundari Wellness · Website & SEO Design, content & SEO · Live demo

- Redesigned the spa's website as a single-page site built to convert, with treatment pop-ups, WhatsApp and Book Now actions.
- Moved gift vouchers in-house to keep revenue and customer data on the spa's own site.
- Now running SEO with the client: structure, metadata and content to rank and convert.

Dashbox · Data & analytics platform Founder & builder · Paused

- Built a platform that turns large volumes of market data into clear rankings, trends and alerts.
- Designed filters that combine multiple timeframes and indicators to separate real patterns from noise.

- Joined pre-opening to lead the venue's technical setup, from specification through installation to live operation.
- Ran the marketing team in the opening phase, end to end: branding, USPs, website, social media, content and launch campaigns.
- Own the venue's technical systems and infrastructure, keeping the guest experience running smoothly every day.
- Work daily with management, operations, marketing and sales teams, turning what they need into practical systems.
- Source, brief and manage suppliers and contractors, holding them to scope, quality, cost and timelines.
- Coordinate multiple projects and priorities at once in a busy, guest-facing environment.
- Act as first-line escalation for technical issues during live service, resolving them quickly with minimal guest impact.
- Write clear procedures and train staff on systems, so operations don't depend on one person.
- Evaluate and introduce software tools that remove manual work and spreadsheets for the management team.
- Replaced a spreadsheet-based schedule with a purpose-built, database-backed tool now used every week.
- Report to senior management with structured updates on status, risks, costs and recommendations.
- Bridge management, operations, marketing and sales on systems, data and back-office processes.

**Senior Project Manager · Head of Marketing & Products · Split Dragon
(Amazon partner agency), Bali**

Aug 2022 – Aug 2023

- Led marketing and products at an e-commerce agency and Amazon partner, managing brands selling on Amazon.
- Spoke with US clients daily, owning the relationship and the results across time zones.
- Ran Amazon marketing for client brands: product listings, content, imagery and brand stores built to convert.
- Managed Amazon advertising campaigns, balancing ad spend against sales and return on spend.
- Used sales, traffic and advertising data to find what was working and shift budget to it.
- Produced regular performance reports for clients on sales, ad spend, conversion and growth.
- Planned product launches and promotions with clients, from listing set-up to launch campaigns.
- Briefed and coordinated designers, copywriters and specialists to deliver on time.
- Agreed scope, targets and priorities with each client, and managed changes formally.
- Bridged clients' commercial goals with the marketing team delivering them.

CRM & ERP Project Manager · Marketing · Potato Head Family, Bali

Apr 2019 – Dec 2020

- Sat within the marketing department, working day to day with the marketing team on guest data, CRM and campaigns.
- Delivered CRM and ERP projects for one of Asia's best-known hospitality and lifestyle brands, including hands-on work with Salesforce.
- Project-managed the ERP build from requirements through configuration, testing and rollout.
- Worked closely with the marketing team on CRM and guest data, including email campaigns and email blasts.

- Helped turn guest data into segmented marketing, so the right message reached the right guests.
- Gathered requirements from marketing, sales, guest services, F&B and IT, and mapped how each team used guest data.
- Translated business needs into CRM requirements: guest profiles, data fields, workflows and reports.
- Supported cleansing and migration of customer data from legacy tools and spreadsheets into the new systems.
- Coordinated vendors, internal IT and department heads through configuration, integration and testing.
- Ran user acceptance testing and supported go-live across multiple venues, with staff training on the floor.
- Reported progress, risks and decisions to senior leadership in clear, structured updates.
- Acted as the bridge between marketing, sales, operations and IT, so guest data served revenue, not just storage.

Products & Marketing Manager · Schone Digital (Amazon partner agency), Singapore

Nov 2017 – Apr 2019

- Led products and marketing at a Singapore e-commerce agency and Amazon partner.
- Ran Amazon and e-commerce marketing for client brands, from listings and content to brand stores.
- Managed online advertising and promotions, measured against sales and return on spend.
- Ran e-commerce platforms and the customer journey from first visit through checkout.
- Worked with clients on campaigns, email marketing and promotions across channels.
- Oversaw analytics and tracking, so campaign and sales performance could be measured, not guessed.
- Used customer and sales data to find drop-off points and improve conversion.
- Built reporting so clients and leadership could see what was working and where to spend.
- Managed designers, developers and external partners through delivery.
- Worked agency-side, so I know how to brief, measure and get the best out of a marketing agency.

Digital Project Manager · Mobile App & Web Design · DMI (Digital Management, LLC), Phnom Penh

Sep 2013 – Jan 2018

- Managed mobile app and website design projects for over four years, client-facing throughout, with a focus on user experience and brand.
- Ran discovery and requirements workshops directly with clients to define goals, users and scope.
- Designed user journeys with clients, including sign-up, account and engagement features.
- Turned client goals into specifications and acceptance criteria for engineering teams.
- Coordinated designers and remote engineering teams across locations and time zones.
- Presented designs and working builds back to clients and gathered structured feedback.
- Ran agile delivery with sprint planning, backlogs, stand-ups and reviews.
- Managed QA and user acceptance testing across devices and browsers.
- Handled change requests and kept scope, budget and timelines under control.
- Owned post-launch support, keeping clients informed until issues were closed.
- Bridged clients' marketing and business goals with the engineering teams building their products.

Commercial Project Manager · Cellcard (CamGSM), Phnom Penh

Sep 2012 – Sep 2013

- Delivered commercial and customer-facing projects for Cambodia's leading mobile operator, working across marketing, sales, customer care and IT.
- Worked closely with marketing and sales on launches of new customer services and offers.

- Gathered requirements from commercial teams and turned them into delivery plans.
- Managed vendors and technology partners against scope, timelines and commitments.
- Planned testing and cutovers to protect the customer experience.
- Coordinated launch readiness with customer-facing teams.
- Tracked risks, issues and dependencies across multiple teams.
- Produced structured status reports for management.
- Bridged marketing, sales, customer care and IT on customer-facing launches.

Customer Service → Project Manager → Technical Project Manager · Bank of America, Chester, UK Sep 2001 – Nov 2011

- Started in customer service, dealing directly with customers and learning what keeps them loyal.
- Progressed from customer service to Project Manager, then to Technical Project Manager in 2005.
- Delivered technology change for customer-facing systems in a heavily regulated banking environment.
- Gathered requirements from business users and translated them for technical teams.
- Worked within formal change control, with every change documented, approved and traceable.
- Planned and ran rigorous test cycles before changes reached customers.
- Coordinated stakeholders across business, technology and operations.
- Built detailed Excel trackers and management information reports, turning numbers into decisions.
- Maintained project documentation, RAID logs and governance reporting.
- Built the customer focus and delivery discipline that still shapes how I work.

● **Education**

Business and Tourism · West Cheshire College, UK
